

APPENDIX D

IOWA OPPORTUNITY INDEX CENSUS TRACTS

The “high” and “very high” opportunity areas were calculated as part of the State of Iowa’s Analysis of Impediments to Fair Housing Choice. IFA and IEDA are required to conduct such an analysis because both agencies administer HUD funding. One of the components of the Analysis is to identify Opportunity Areas.

HUD adapted the Communities of Opportunity model to calculate opportunity index scores for each census block group on six separate dimensions. Each dimension analyzed for Iowa’s Analysis of Impediments to Fair Housing Choice includes a collection of variables describing conditions for each census tract in the State.

- **Prosperity** includes rates of family poverty and the receipt of public assistance (cash welfare, such as Temporary Assistance to Needy Families) to capture the magnitude of a given neighborhood’s rate of poverty.
- **Labor Market Engagement** measures the level of employment, labor force participation, and educational attainment in each neighborhood to describe its local human capital.
- **Job Access** gives each census tract a score based on distance to all job locations, weighting larger employment centers more heavily. The distance from any single job location is positively weighted by the number of job opportunities at that location and inversely weighted by the labor supply (competition) of the location.
- **Mobility** was calculated based on commute times and the percent of people who travel to work via public transit.
- **School Proficiency** uses the results of the Adequate Yearly Progress (AYP) test by elementary, middle, and high school students as a proxy for educational quality. Rates of proficient scores for all grades for both the reading and math exams are combined into one overall score for each school district.
- **Community Health** for a given tract was calculated as a function of the number of residents without health insurance and low food access ranking by the USDA.

The objective of pinpointing Opportunity Areas is to identify places that are good locations for investment that may not have been selected based on other criteria. This identification allows for balanced investment across neighborhoods that offer opportunities and advantages for families.
